

Music has a brilliant future in Kerman

■ "Rock" concerts in Kerman has increased people's expectation.

Written by: Mehran Tajali

Paying attention to people's happiness and succulence is one of the most important issues related to salutary and health in our society, and its inattention consequences, cause wealth fugacious and mental diseases.

Nowadays, the government uses its all efforts to prevent capital outflow from the country such as spending heavy costs by some musicians and their fans in countries like Turkey and Emirates and has been succeeded to make it, as now we can see realism takes place of radicalism and ignorance.

Today, the "Prudence and Hope" government has created a good atmosphere in the country through meritocracy and concentration on cultural-artistic demands of society, such that concert tradesmen in neighbor countries were surprised. The politician's prudence is considered as a salve on people's spiritual wounds and this approach continues appropriately in Kerman province. During 2 last years by plurality of concerts and live performances of Kermanian and none Kermanian music groups and even "Rock" concerts, with their special fans, in this province, people's elegance and their music knowledge level have progressed and this process, although needs revision, owes related officials' open mind, particularly their attention to public spiritual health. During last year, increasing live music performances caused that music addressees to choose their favorite concerts by more knowledge and awareness, and consequently their decision making power and satisfaction has increased. If concert numbers decrease, addressees will have to choose a concert of any style and quality to merely have a fun, while they don't belong to that atmosphere and music type and this perform wrong choice causes a lot of problems including lack of a proper mutual communication between music band and its audiences, that is considered as the source of other problems.

The first consequence of the lack of a satisfactory feedback between audiences and music band members, is discouragement of performers which eventually creates audiences pessimism and thus, as it is obvious, a vicious cycle will be continually repeated and rises more problems.

The "Happiness and Succulence Plan" designed by Kerman's authorities is on progress well, such that the quality of live performances improved beyond expectations of art lovers. Certainly, the project is following up in all parts of the country as far as foreign singers and musicians' live performances will be provided as well. For example, "Kitaro" and "Chris de Burg" performances in Iran in a near future are notable. The Kerman's governor general, Razm Hosseini, focusing on public health and succulence, supports foreign music bands performances in Iran especially in Kerman. To arrange a live performance of the "Gipsy Kings" music group in Kerman by some sponsors is also another example of upcoming events.

The obvious and noteworthy point is that through Kerman province's culture and art managers' wisdom and prudence along with governor general's supervision, the hope to hold concerts with best quality and various styles, has been increased. Thus a bright future of Kerman's culture and art is expected and based on people's improved satisfaction, this future is attainable.

Red carpet; for foreign investors

Written by: Mohammad Fath Nejat

Since 2 years ago, when a local and brainy governor general has taken the responsibility of Kerman province and during these years the whole province has been developed as much as a 20 years development. If development continues at the same rate and quality, it is possible to say that the province will experience an expanding and dynamic development as much as 100 years in a short time. "We roll out red carpet for foreign investors" stated the governor general as a slogan in his first speech. Today, politician's slogans are treated with uncertainty and doubt, as a few of them are executed. Honestly speaking, governor general of Kerman province has extended red carpet for foreign investors. In the past few months, multiple groups from China, Japan, Germany and other industrial countries made contracts to several companies in Kerman which most of the contracts set up operations such as contracts of mines of Zarand that are progressing too fast.

Competition of foreign companies in Kerman

In recent years, Kerman industries have

welcomed private sector especially foreign investors. The news released on the second of June 2015, reported that the governor general Razm Hosseini declared "competition of foreign investors in Kerman" and noted:

"The area of Kerman province equals to the total area of Belgium, Netherland and Finland besides this province have four seasons climate. For example, the south of province experiences 320 sunny days and in some places there is not even a spot of cloud in the sky for a short time. The condition provides an opportunity to use solar energy. In this area it is possible not only to establish power plants but also to run factories for producing solar cells".

Germany ambassador and alternative energies

The ambassador of Germany went to the south of Kerman and observed closely the sunny areas. After doing some discussions on alternative energies, he declared his tendency for investment. Moreover, a Chinese group have declared an agreement for investment in these areas.

The condition of Kerman industries imply that the province is an arena of competition for foreign investors and soon its interactions to foreign countries in mining, tourism and other industries will be increased more than other provinces of Iran.

The governor general of Kerman province declared in a meeting that to remove the most of barriers (troubulous rules) which foreign investors confront is a definite policy of the current government and the policy has been implemented largely as far as the amount of investment has been increased. He noted that we can promise foreign investors not to confront any barrier and we cooperate them as much as possible.

He continued:

"China prized this opportunity and volunteered to set out operations in various fields including producing energy, mining, industrial productions and so on, and its interaction with Iran is more than other countries. We hope that other industrial countries also can take advantage of the opportunities that Iran offered them.

The General Manager of Public Relations section of Kerman's governor general's office:

Investors are invited for a travel to Kerman to witness our proceedings

Social Desk:

The present newspaper was prepared and published, according to Kerman's governor general's recommendation and also by order of Public Relation section of governor general's office. Thus, it is appropriate to make an exclusive interview with General Manager of Public Relation section of Kerman's governor general's office, Azim Zadeh, for more acquaintance of addressees with the contents. Azimi Zadeh initially referred to Kerman province's tourism potentials and stated: Kerman as the largest province in Iran is of particular economic and commercial opportunities and has a strategic position in Iran. Various sources are distributed in the whole province from north to south, as well as so many business with constant incomes opportunities that are available throughout the province.

He remarked: tourism industry, historical and natural attractions, mining and agricultural industries caused the province to be unique among other provinces of Iran. Three historical places in Kerman province that were registered in the list of UNESCO's World Heritage Sites including "Arg-e Bam", "Shahzadeh Garden" and "Meyman Village" along with hundreds of historical monuments such as Kerman's Bazar, Fath Abad Garden and Halil Rud's Civilization Area, as well as natural attractions like Hezar Mountains, Shahdad Kaloutes and son on, set the province as an appropriate place for native and foreign tourists.

On mining potentials of the province he explained: on the mines it is notable that the province is a mining paradise in Iran and the most widely and richest mines of the province including copper, iron ore and coal have been exploited for many years, moreover, some other industries were developed by mining industry. Agricultural based industries and local businesses also have been developed in the province although they need to be more progressed. The province contains approximately a quarter of the total amount of Iran's agricultural gardens, moreover, it is the leading province in some agricultural products such as date, pistachio, citrus, damask rose (rosa x damascene) and so on.

He continued: the vast Kerman is leading in

aviation industry too as Mahan Airline is the largest private airline in Iran and is considered as a pride for the province. With the rise of "Prudence and Hope Government" (11th government) when hope and spirit blew in the whole society, the president Rouhani has improved world's viewpoint of Iran through his admirable policies, and now he is conducting the country in the road to peace as it is worthy for Iran's nation. In this amid, Kerman province, given its effortful governor general, has an important and pivotal role in improving country's business. Economic ideas of kerman's governor general, Razm Hosseini, his special attention to private sector, his emphasis on removing government from economy and omitting troublous and pesky rules such Golden Sign, are from his popular features. His special focus on sports and social vitality by, for example, designing Sports Development Plan as well as issuing license for performing various music concerts, caused that hope and vitality returns to youth and society. His ideas known as Economic Development Triangle resulted in concluding several investment agreements for 75000 milliard Tomans, the amount which is so considerable regarding downturn circumstances of the country.

Azimi Zadeh regarding publication of the present newspaper stated: according to the present situation of the country and province, the Public Relation section of Kerman's governor general's office, decided to present

various opportunities available in the province and introduce different areas that resulted in publishing the present newspaper in your hand. Now that all people are trying to build up the country with each other's harmony and unanimity, Kerman

province also would spare no efforts to reach the goal as the province is an appropriate opportunity for domestic and foreign and yet constant investment. I, on behalf of Kerman's governor general, invite foreign investors to travel to Kerman province to witness our statements practically. Without exaggeration it is possible to say that troublous and pesky rules in Kerman have been eliminated.

Finally he referred to public's communication means to governor general's office and stated: you can contact us and governor general by sending E-mail at: pro@gov.kr.ir and sending message to number: 1000343222222 as well as visiting our website at: gov.kr.ir that covers the province's news in English and Persian languages.
